

**Navigation & Editing:**

- 1}. Quick Open File — `ctrl + p` [allows you to jump to any file by name].
- 2}. Go To Line — `ctrl + g` [enter a line number to navigate directly].
- 3}. Move Line Up/Down — `alt + ↑/↓` [allows you to rearrange code without copy-pasting].
- 4}. Copy Line Up/Down — `shift + alt + ↑/↓` [allows you to duplicate a line instantly].
- 5}. Delete Line — `ctrl + shift + k` [removes the current line].
- 6}. Toggle Line Comment — `ctrl + /` [comment/uncomment a line or selection].
- 7}. Multi-Cursor Editing — `alt + click` [adds cursor] & `ctrl + d` [selects next occurrence].

**Search & Replace:**

- 8}. Find In File — `ctrl + f`.
- 9}. Find In All Files — `ctrl + shift + f`.
- 10}. Replace In File — `ctrl + h`.
- 11}. Replace In All Files — `ctrl + shift + h`.

**Window & Tab Management:**

- 12}. Split Editor — `ctrl + \` [allows you to work on two files side-by-side].
- 13}. Switch Tabs — `ctrl + tab` [cycle through any open files].
- 14}. Close Tab — `ctrl + w`.
- 15}. Reopen Closed Tab — `ctrl + shift + t`.

**Code Formatting & Refactoring:**

- 16}. Format Document — `shift + alt + f` [auto-format code; requires formatter like Prettier].
- 17}. Rename Symbol — `f2` [rename variables/functions across files].
- 18}. Quick Fix — `ctrl + .` [fix any errors; add imports, correct syntax, etc.].

**Terminal & Debugging:**

- 19}. Toggle Terminal — `ctrl + ```.
- 20}. Run/Debug — `f5`.
- 21}. Toggle Breakpoint — `f9`.

**Version Control [Git]:**

- 22}. Commit Changes — `ctrl + shift + g` → Type Commit Message → `ctrl + enter`.
- 23}. View Git Diff — `alt + g` then `d` [Along w/ GitLens Extension].

## Extensions & Customization:

24}. Command Palette — `ctrl + shift + p` [access all vs code commands].

25}. Reload Window — `ctrl + shift + p` → Type “*Reload Window*” [restarts vs code without closing it completely].

## Bonus Shortcuts:

26}. Fold/Unfold Code — `ctrl + shift + [` [fold] / `ctrl + shift + ]` [unfold]].

27}. Emmet Abbreviation — Type `! + Tab` [type this in HTML for boilerplate].

28}. Zen Mode — `ctrl + k → z` [distraction-free coding].

29}. Markdown Preview — `ctrl + shift + v` [toggle preview].

30}. Copy Relative Path — Right-Click File → “*Copy Relative Path*”.

\*Customize Shortcuts — Go To `File > Preferences > Keyboard Shortcuts` .

\*Learn More — Press `ctrl + k → ctrl + s` to open the Keybindings Cheat Sheet.
